PROFILE

Computer Engineering student with a growing focus on Cybersecurity, Network Security, Vulnerability Assessment and Penetration Testing. Familiar with Kali Linux and security tools including Nmap, Nessus and Wireshark, with hands-on learning through TryHackMe. Interested in developing practical cybersecurity skills and applying security concepts through projects and real-world scenarios.

TECHNICAL SKILLS

Cybersecurity	Network Security, Vulnerability Assessment, Penetration Testing, Kali Linux, Nmap, Nessus, Wireshark
Programming	C, Java (Basic), Python (Basic)
Web Development	HTML, CSS, JavaScript (Basic), React (Basic)
Database	MySQL
IoT	Arduino, NodeMCU / ESP32

EXPERIENCE

Edunet Foundation

2026

AI/ML & Green Skills Intern

2-Week Internship

- **Contribution:** Data Analysis, Machine Learning & Capstone Development
- Worked with Python and machine-learning workflows including data preprocessing, feature engineering and model development.
- Worked with real-world datasets using data analysis and visualization techniques.
- Applied regression, classification and clustering algorithms during the internship.
- Developed **Eco-Scan AI**, an AI-powered waste detection and recycling assistant, as the capstone project.
- [Verify Certificate]

PROJECTS

HealthVault – Secure Digital Health Records

Database & Security

- **Technologies:** PHP, MySQL, JavaScript, HTML/CSS
- **Contribution:** Database design and security implementation.
- Contributed to database design and management for a secure digital health-record platform.
- Worked on authentication, access control and data protection features.
- Helped integrate security mechanisms into the application.
- [GitHub]

Eco-Scan AI – Smart Waste Detection & Recycling Assistant

AI / Computer Vision

- **Technologies:** Python, TensorFlow/Keras, Computer Vision, Streamlit
- **Contribution:** AI/ML development and application implementation.
- Developed an AI-based application for detecting and classifying waste from uploaded images.
- Worked on the CNN-based waste classification workflow and data processing.
- Integrated waste classification with disposal-bin recommendations and recycling information.
- [GitHub]

PRAXES 2026 – Event Website

Web Development

- **Technologies:** React, Vite, JavaScript, HTML/CSS
- **Contribution:** Frontend and backend development.
- Collaborated with a team to develop the PRAXES 2026 event website.
- Contributed to frontend development and backend-related implementation and integration.
- Worked with the team on testing, integration and deployment of the web application.
- [\[GitHub\]](#) — [\[Live Demo\]](#)

CERTIFICATIONS

Edunet Foundation – Foundation Course on Green Skills and Artificial Intelligence

July 2026

- Internship Certificate [\[Verify Certificate\]](#)

TryHackMe – Pre Security Learning Path

- Completed – Multiple Badges [\[Verify\]](#)

EDUCATION

Bachelor of Engineering (B.E.) in Computer Engineering

Expected 2027

Government Engineering College, Palanpur

Gujarat Technological University (GTU), Gujarat, India

CGPA: 7.63/10 (6th Semester)

LANGUAGES

Gujarati — Hindi — English
